TOUGH

TOUGH HERBICIDE

TOUGH is a Group 6 herbicide that can be used for the control or suppression of emerged, actively growing, broadleaf weeds.

TOUGH delivers exceptional efficacy on a wide spectrum of broadleaf weeds including Kochia in Pulse crops.

TOUGH's unique mode of action inhibits photosynthesis in broadleaf weeds, producing excellent results in 7 – 10 days.

**DON'T LET KOCHIA
CONTROL YOUR PULSE**

When applied **in-crop** to chickpeas at the 1-4 node stage and up to maximum height of 20 cm, TOUGH 600 EC is the only product available to treat Group 2, 4 and 9 resistant Kochia.

In-house and independent research trials demonstrate that TOUGH 600 EC provides effective control of Kochia up to 10 cm in height.

TOUGH TECHNICAL INFORMATION	
For post-emergent use in:	Chickpea, Mint
For pre-seed use in:	Chickpea, Lentil, Dry Pea, Mint
HRAC Group:	6
Active Ingredient:	Pyridate – Group 6 PSII inhibitor
Formulation:	600 g /L Emulsifiable Concentrate
Packaging:	2 x 9.18 Litre (30 – 60 acre/case coverage)
Mode of Action:	Photosynthesis II Inhibitor
Key weeds:	Kochia, Lambsquarters, Wild Mustard, Common Waterhemp & More. (See label)
TOUGH is a registered trademark of Belchim Crop Protection Canada	

Crop	Weeds	REI (Hr.)	PHI (Days)	Application Recommendations	Rate
Pre-Seed Chickpeas Lentils Dry Peas Mint	Kochia, Lambsquarters, Wild Mustard, Common Waterhemp Redroot Pigweed & More (See label)	NA	NA	Apply when weeds are ≤ 2 leaf stage Apply when sunlight is expected Do not apply by air. Do not apply when temp. exceeds 25°C. Do not apply through any type of irrigation system. Do not allow drift to off-target vegetation. Do not allow drift to wetlands or surrounding native plant communities. Use spray nozzles that provide medium to coarse droplets (250 – 400 microns VMD)	750 – 1500 ml / ha in a minimum of 100 L water / ha 202 – 607 ml / acre in a minimum of 11 gal. water / acre
Post-Emergent Chickpeas		12	60		
Post-Emergent Mint		See label	45
