Homeplate

Total Vegetation Killer

HOMEPLATE® HERBICIDE

Total Vegetation Killer

Strike out weeds with Homeplate®, a nonselective herbicide providing fast, long lasting control of broadleaf weeds and grasses. This superior formulation, containing capric and caprylic acids, provide improved spreading and burndown for fast, effective weed control.

Homeplate works by quickly disrupting plant cell walls and removing the waxy protective cuticle from leaf tissue, resulting in the rapid reduction in photosynthesis, tissue dehydration and stem collapse in target plants.

OMRI LISTED
For Organic Use

Active Ingredient:

Capric, Caprylic Acid Blend 79.9%

Key Crops:

Tree fruit, grapes, potatoes

Key Targets:

Weeds, grasses

Application Method:

Vegetative burndown, shielded or directed spray, sucker control, dessication

Packaging Size:

2 x 10L

Belchim Canada
GROWING TOGETHER

Long Lasting Control
Homeplate's weed control is faster and more complete than similar fatty acid herbicides resulting in extended spray intervals or reduced spray concentration.

Superior Spreading and Fast Burndown
Homeplate's unique formulation allows superior spreading and leaf coverage resulting in fast and effective weed control within 12-72 hours depending on environmental conditions.

Flexible Use Pattern
Homeplate's use rate is adjustible - Use 3% solutions for small or young weeds, and use up to 9% for tough to kill vines and brush.
0 day PHI, 4 hour REI and multiple use application including vegetative burndown of weeds, grasses, moss, algae, and for sucker control.

For Best Results:

- Target small weeds
- Spray under hot, dry conditions
- Optimize spray coverage
- Use higher rates on tough weeds

CROP/USE SITE	USE METHOD AND APPLICATION TYPES	DILUTION
Small fruit and berries: Rape, blueberry, raspberry	Directed and Shielded sprays	3-6%
	Sucker control	9%
Tree fruit Pome, Stone Fruit, Tree Nuts	Vegetation burndown, directed and shielded sprays	3-6%
	Sucker control	9%
Potatoes	Desiccation	9%
Greenhouse	Vegetation burndown, directed and shielded sprays	3-6%
Non-Crop Sites walkways, sidewalks, around landscaping, etc	Vegetation burndown, directed and shielded sprays, Structural and building applications	3-6%
See label for more excellent product uses.		

3% by volume:

For young or newly germinated weeds less than 3 inches tall, moss and algea.

Mix 3 litres per 100 L of spray volume or 30 ml per litre.

6% by volume:

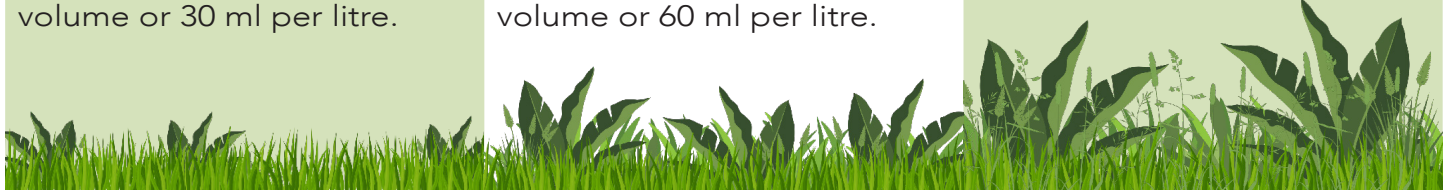

For weeds larger than 3 inches, soft growth perennials and grasses.

Mix 6 litres per 100 L of spray volume or 60 ml per litre.

9% by volume:

For tough to kill weeds, vines, brush, and sucker control.

Mix 9 litres per 100 L of spray volume or 90 ml per litre.
