

## KATANA REBATE PROGRAM

### KATANA™ HERBICIDE

Katana® is an innovative, residual herbicide that can be used in forest site-preparation, conifer release and Christmas Tree production. Katana has a wide application window and provides both pre and post emergent, season long control on many grassy and broadleaf weeds species.

Katana is registered for both ground and aerial applications in forestry as well as ground applications in Christmas tree plantations. It can be tank mixed with a wide range of other herbicides to broaden the spectrum of control. With a low use rate and low mobility in soils, Katana is especially appealing for use in sensitive areas.

Take advantage of the Katana rebate program before September 30<sup>th</sup>, 2024.  
See reverse for details.

## POWER UP YOUR GLYPHOSATE APPLICATION!

The key to seedling survival and successful plantation establishment is providing unfettered growing conditions for a sufficient period of time to allow seedlings to become established. Katana™ can be tank mixed with many other herbicides including glyphosate to extend the period of control and increase growth. Katana™ provides seedlings with a longer opportunity to take advantage of available soil nutrients and resources.

### KATANA REBATE PROGRAM

**2 case minimum purchase required**

Purchase Qty.	Rebate
Less than 2 cases	\$0 / case
2 – 4 cases	\$145 / case
5 + cases	\$215 / case

- Program period: April 1, 2024 – Sept. 30, 2024
- Open to all “end users” of Katana Herbicide
- Valid on total purchases made by a single client
- Not applicable to group purchases
- Proof of purchase required
- Rebate requests can be submitted by mail to:  
Belchim Crop Protection Canada (Order desk) 104  
Cooper Dr., Unit 3  
Guelph, ON., N1C 0A4

or by email: [orders.canada@belchim.com](mailto:orders.canada@belchim.com)

Rebate requests must be received by Oct. 15, 2024

### KATANA TECHNICAL SPECIFICATIONS

**For use on:** Broad leaf weeds & grasses

**Active Ingredient:** Flazasulfuron 25%

**Concentration:** 250 grams a.i. / kg

**Formulation:** Dry flowable

**Packaging:** 6x 404 grams

**Mode of Action:** ALS inhibitor (sulfur-urea)

: Group B

### APPLICATION INFORMATION FOR KATANA™

Application	Rate for all applications
Pre and post-emergent control or suppression of grasses and broadweeds	150 – 200 grams a.i./hectare in 150 – 450 Litres of water

**Spray coverage should be uniform and complete.**

**Do not spray to the point of run-off.**

**Do not allow spray drift to contact desirable vegetation.**

Katana™ is a trademark of Belchim Crop Protection Canada.  
Always read & follow label directions

**For more info, please contact: Michael Cunningham. 506 447 7842 or [michael.cunningham@belchim.com](mailto:michael.cunningham@belchim.com)**

Flazasulfuron, the active ingredient in Katana™ herbicide belongs to the sulfonyleurea chemical class of herbicides. It has a broad spectrum of activity controlling grasses, sedges and many broadleaf weeds. The low use rates and excellent environmental profile provide forestry managers an exceptional tool for vegetation control.
